PROFESSIONAL SUMMARY

Entry-level Full Stack Web Developer with a B.Sc. in Computer Science and hands-on experience building responsive, user-centric web applications. Proficient in HTML5, CSS3, JavaScript, and Bootstrap. Passionate about writing clean, maintainable code and delivering polished digital experiences. Actively expanding into React and modern front-end tooling; eager to contribute to a high-impact engineering team.

TECHNICAL SKILLS

Tech-stack: HTML5, CSS3, Bootstrap 5, JavaScript (ES6+), REST APIs, Responsive Web Design, React.js

Backend: MySQL, Firebase

Tools & Platforms: Git, GitHub, VS Code

Concepts: UI/UX Principles, Cross-browser Compatibility, Semantic Markup, Web Performance, Version Control

PROJECTS

E-Commerce Product Promotion Website | *HTML5, CSS3, JavaScript, Bootstrap 5*

Academic Project

- Designed and delivered a fully responsive e-commerce website, achieving consistent UX across devices from 320px to 1920px viewports.
- Built dynamic product cards with category-based filtering and improved visual hierarchy, reducing user navigation steps.
- Leveraged the Bootstrap 5 grid system and custom media queries; applied semantic HTML and optimised asset loading to improve page speed.
- Implemented modular JavaScript for interactive UI components (image sliders, product modals) without relying on external libraries.

Theme Park Web Platform | *HTML5, CSS3, Bootstrap 5, JavaScript (ES6+)*

Academic Project

- Designed and deployed a fully responsive, mobile-first static web application showcasing theme park attractions, pricing tiers, and ride schedules.
- Programmed interactive client-side logic using vanilla JavaScript to handle dynamic user interactions, including automated ticket pricing calculations.
- Structured clean, semantic HTML5 markup and leveraged Bootstrap's grid system to ensure seamless cross-browser compatibility and consistent UI rendering across all device viewports.

Cryptocurrency Real-Time Tracker | *JavaScript (ES6+), Bootstrap 5, HTML5, CSS3, REST APIs*

Academic Project

- Developed a lightweight frontend dashboard to track live market statistics, pricing variations, and trading volumes for top cryptocurrencies.
- Engineered asynchronous JavaScript functionality using the Fetch API with async/await to securely handle HTTP requests from public cryptocurrency data endpoints.
- Created user-friendly client-side features, including live search filtering and dynamic DOM updates, allowing visitors to instantly isolate specific tokens without refreshing the viewport.
- Styled modern responsive interface components using Bootstrap 5 to guarantee cross-device presentation consistency from desktop screens down to mobile layouts.

EDUCATION

B.Sc. in Computer Science —

2023 – 2026

MIT College, Alandi, Pune, Maharashtra

Higher Secondary Education (HSC)

2021

Maharashtra State Board

CERTIFICATIONS

Web Development with HTML & CSS — Self-directed Online Certification

2025

ACHIEVEMENTS & STRENGTHS

- Strong foundational knowledge in core computer science disciplines and data structures.
- Built and deployed multiple responsive web applications independently from scratch.
- Bootstrap 5 and advanced CSS layout techniques outside of college coursework.
- Consistently applied core engineering principles, including semantic HTML and DRY development patterns.
